Full stack engineer with a frontend focus and leadership experience who contributes across the stack to build scalable, responsive, accessible, and high-quality UI and software platforms in close collaboration with product and design teams

SKILLS and PROJECTS

Web: React, Angular, TypeScript, JavaScript, ES6, RxJS, JQuery, CSS, SCSS, HTML, Data Visualization (Chart.js, Recharts, amCharts), Bootstrap, Material UI, Node.js, SQL, PostgreSQL, Python, GraphQL, WordPress CMS, Jasmine, Karma

Design and DevOps: Microsoft Azure, Docker, Buildbot, Google Maps API, Git, Google Analytics, Figma, Fullstory

Projects: Book Ends Reading Tracker [bookends.design](#) ↔ Running Pace Check [race-pace-yourself.netlify.app](#)

PROFESSIONAL EXPERIENCE

Nexleaf Analytics, Remote

Senior Frontend Software Engineer

September 2022 – Present

- Leads development of complex frontend features from inception to launch, partnering with Product to iterate on UX/UI, resolve ambiguity, and deliver polished, high-impact, responsive UI in line with Figma designs
- Serves as a team lead for new features: flagging decision points, guiding architecture, reviewing and delivering code, and aligning implementation to ensure compatibility and maintainability of new features
- Owned the re-design, user testing, implementation and delivery of critical device installation dashboard workflow that supports every technician in the field ahead of a major hardware release
- Proactively unblocks frontend progress by decoupling dependencies and dipping into the backend as needed, in order to maintain a high execution velocity across sprints, and ship new features on time and to spec
- Supports design and development of AI chatbot to help users get quick answers on the latest data from their regions
- Mentors engineers by onboarding teammates to codebases and frontend systems, accelerating their ability to contribute
- Embraces iteration and feedback loops, quickly adapting frontend work to shifting requirements or design constraints
- Angular, TypeScript, RxJS, SCSS, HTML, Python, Docker, RESTful API, Jasmine and Karma (test suite), AWS, Figma, GitHub

EnviroIssues, Seattle, WA

Web Developer

May 2018 – August 2022

- Lead developer on creative team building responsive, accessible websites to support outreach strategies for public clients
- React, HTML, CSS, JavaScript, JQuery, Charts.js, SQL, Bootstrap, .NET MVC, RESTful APIs, Google Maps API, Google Analytics, GitHub, Bitbucket, Azure, SiteGround, Alchemer. CMS: Orchard, WordPress, headless CMS

Business Development Associate

April 2013 – August 2015

- Managed business development team and built metrics dashboard and data analysis tools to better assess trends

Tilth Alliance (Seattle Tilth) Seattle, WA

Director, Environmental Programs

August 2015 – November 2017

- Oversaw strategy and direction for 11 person team; managed \$890K project portfolio funding core environmental programs
